Jordan Saker

JUNIOR WEB DEVELOPER

Motivated, team-orientated web developer who enjoys learning. With a keen interest in Backend Development but very versatile and adaptable to be proficient in designing and implementing Frontend applications. Able to produce efficient code to achieve the desired outcomes and always looking for ways to improve.

KEY PROJECTS

Harvard Reference Generator for Markdown

<https://github.com/jordansaker/TerminalAppT1A3>

- Features reference and citation insertion into markdown file, website, book, journal, and video reference types.
- Made with Python

Loan Select Cairns

<https://loanselect-website.vercel.app/>

- Redesigned the website layout, fully responsive, using Wordpress Restful API to make the website News page content editable via a dashboard.
- Used HTML, CSS, Javascript, Wordpress API

EXPERIENCE

Farmhand, Lakeshore Pty Ltd; Walkamin, QLD — March 2023 - present

- Working on herbicide, insecticide and fertilisation spray management on orchard trees during the picking and flowering seasons.

Orchard - General Hand, Rivera Farm Management Pty Ltd; Arriga, QLD — February 2020 - January 2023

- Supervised and trained external labour hire, working in areas of land development (planting new blocks) for the orchard, general orchard maintenance, and fruit picking.
- Supervisory role involved managing up to 30 people during picking season, and as little as 12 during the quieter months. The role required me to report to the Orchard Manager, as well as the Area Manager during the picking season.
- Helped to improve efficiency while keeping expenditure the same in land development, allowing for an average of 3.5 ha to be developed a day with a team of no more than 12 people.
- Maintained and troubleshooted electronic systems of the orchard irrigation system. Installed Ag related sensors such as soil probes, temperature sensors, and dendrometers.
